WHO AM I?

I'm a quality assurance tester focus on the automation of tests on web, mobile and API environment. My priority is ensure the behavior and performance of the systems, with the objective to develop a pleasure experience for the final client.

- Java
- Python
- Cucumber
- Jenkins
- Selenium
- Appium
- Git

EXPERIENCE

4/2021 – Now **Automation Quality Assurance**   **Vodafone Group**
I'm working on three different tasks. The first one, is the creation of a test plan and the implementation of it, for the different plugins that GCP Data Fusion has. The objetive of this is to run the tests as regression tests when a new version of GCP Data Fucion or a plugin version is upgraded. The second task is the migration of the tests to a new tool that we are developing for the testing of the pipelines. And the last one is to teach my teammates to use the tool we are developing.
```
Python  /  Google Cloud Platform  /
```

8/2019 – 4/2021 **Quality Assurance**   **Amaris**
Responsible of the quality assurance of three micro services. Creating the test plan with the collaboration of the business people. I implement the test plan creating a new project, which function was replicate the environment. So the test project make calls to the micro service protect, read kafka events and data in the database.
```
Java  /  Cucumber  /  Gherking  /  Maven  /  Rest-Assured  /  Jenkins
```

3/2019 – 8/2019 **QA Testing**   **Alten**
I define the acceptance criteria with the product owners. Develop the automatic tests for Android Apps and Ios Apps. The technologies used in this project were::
```
Java  /  Cucumber  /  Gherking  /  Gradle  /  Appium  /  Jenkins
```

6/2018 – 3/2019 **Delivery centers, QA & Tools**   **Indra Sistemas**
Responsible of the quality assurance of two webs and three apps, android and ios. The test plans was semi defined by the client.
```
Java  /  Cucumber  /  Selenium  /  Appium  /  Jenkins
```
